

PROJECT EXPERIENCE PROFILE

Project:

Fayette Energy Facility

DUKE/FLUOR DANIELSM

Client:

Duke Fluor Daniel

Location:

Masontown, Pennsylvania

PROJECT FEATURES

CTL Engineering, Inc. provided construction observation, testing & inspection services for the construction of the new power generation facility in Masontown, Pennsylvania.

CTL Engineering provided three (3) engineering technicians for construction observation and materials testing services. One of our senior engineering technicians provided pre-pour quality assurance observation services for Duke Fluor Daniel. Our technicians performed the testing of concrete, soils, aggregates, asphalt and bolted connections for the project site. CTL Engineering has provided specialty-testing including: soil resistivity testing, and Windsor Pin testing.
