

PROJECT EXPERIENCE PROFILE

Project:

Harrison Power Station

Client:

Allegheny Energy Supply

Location:

Haywood, Harrison County, West Virginia

PROJECT FEATURES

CTL Engineering, Inc. has provided construction observation, materials testing and surveying services on an ongoing basis for the power stations upgrades. Construction of the above-pictured 1,000 ft. concrete chimney was one of several projects constructed at this project. The chimney, constructed by Pullman Power Products Corporation, is the largest chimney contract ever awarded in the United States.

CTL's involvement included construction monitoring and materials testing services for soils, concrete and pavement for the project site and monitoring of landfill liner systems for the CO₂ scrubber system.
