

PROJECT EXPERIENCE PROFILE

Project:

Marion Municipal Airport
Taxiway Improvement Project

Location:

Marion, Indiana

PROJECT FEATURES

CTL performed the quality assurance monitoring according to Federal Aviation Association requirements for the reconstruction of Taxiway "A", which is 1,907 feet by 50 feet. The work involved testing of the asphalt paving including verification of the Job Mix Formula and aggregates inclusive of L.A. Abrasion, Sodium Sulfate Soundness and gradation. CTL also performed testing on the plant-produced asphalt paving materials and on pavement cores including Marshall Stability, Flow, VMA, Air Voids and Percent Compaction.
